

Optional
Moulded-In
RFID Cable Tracking

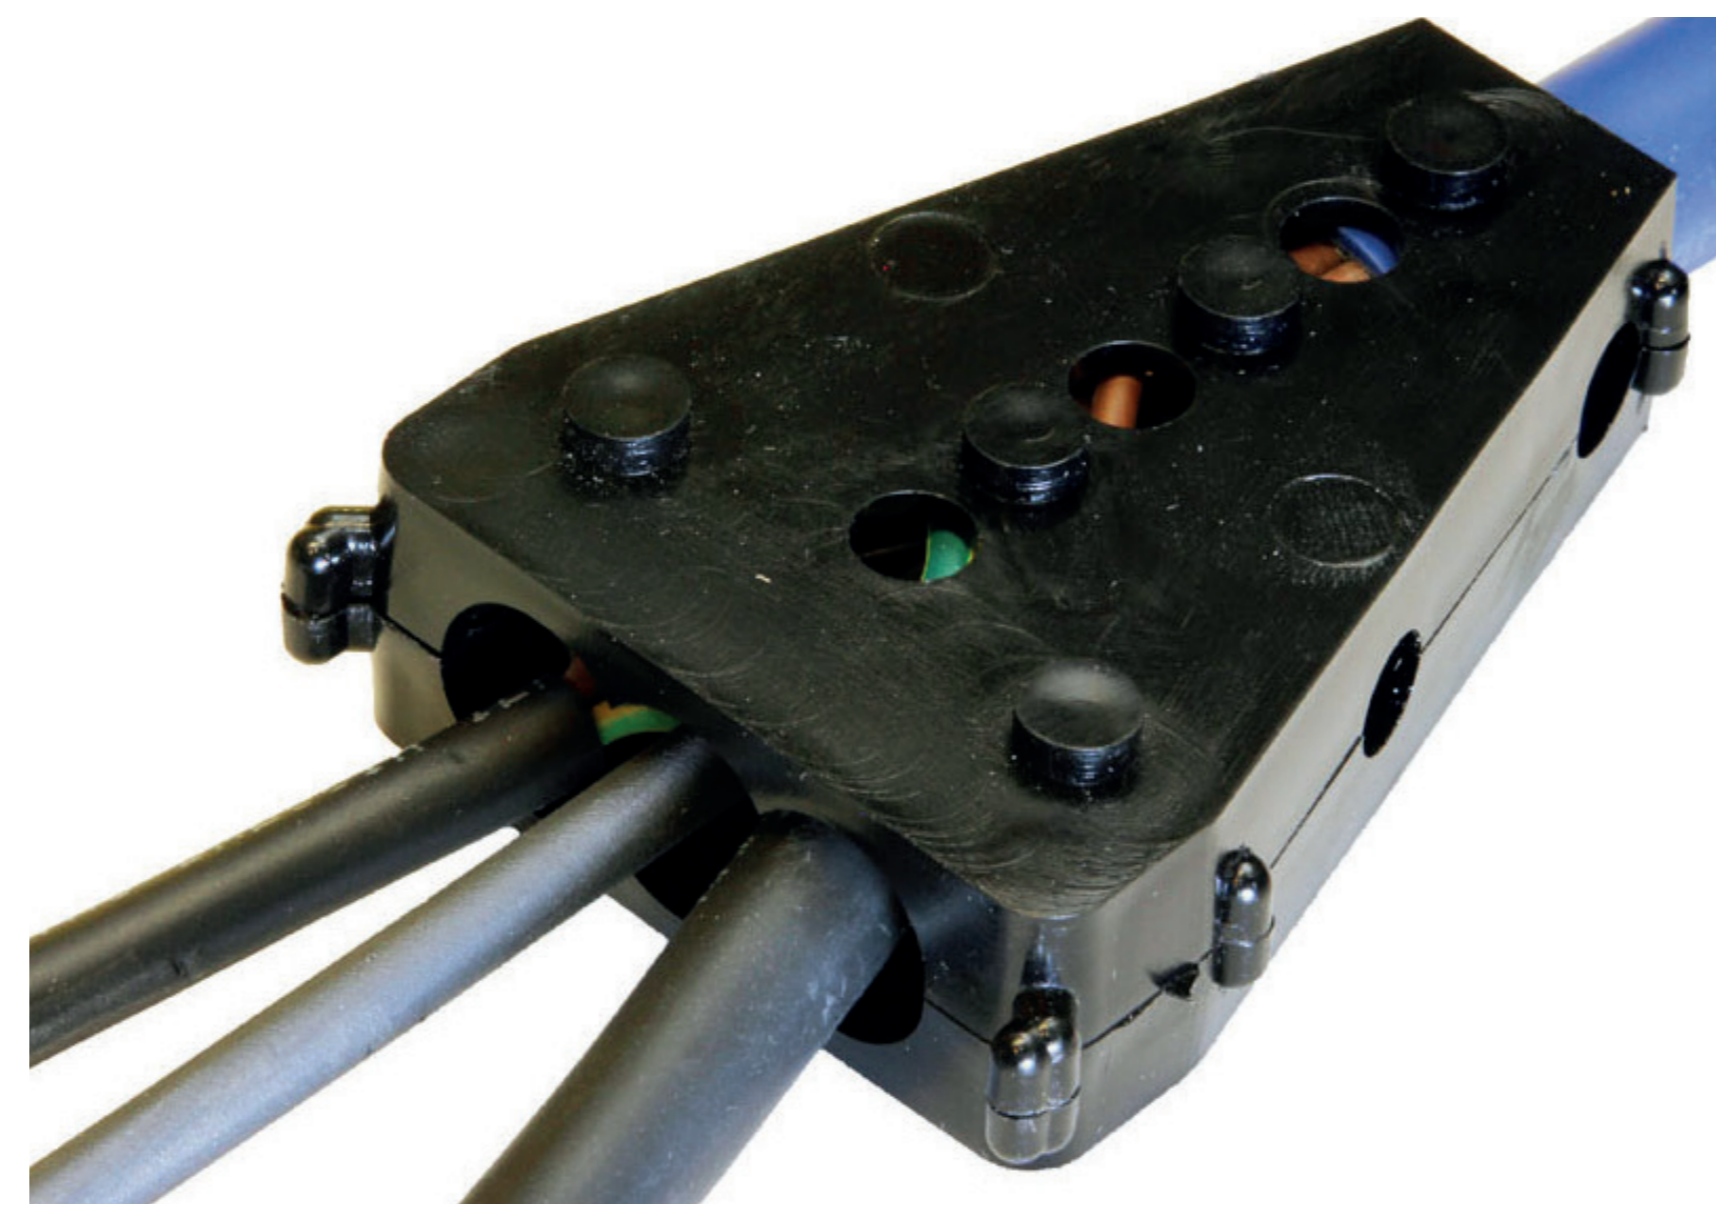

Clarke Cable Splitters. Designed To Withstand The Toughest Environments - Even Forklifts!

Superior Construction and Over-Moulding

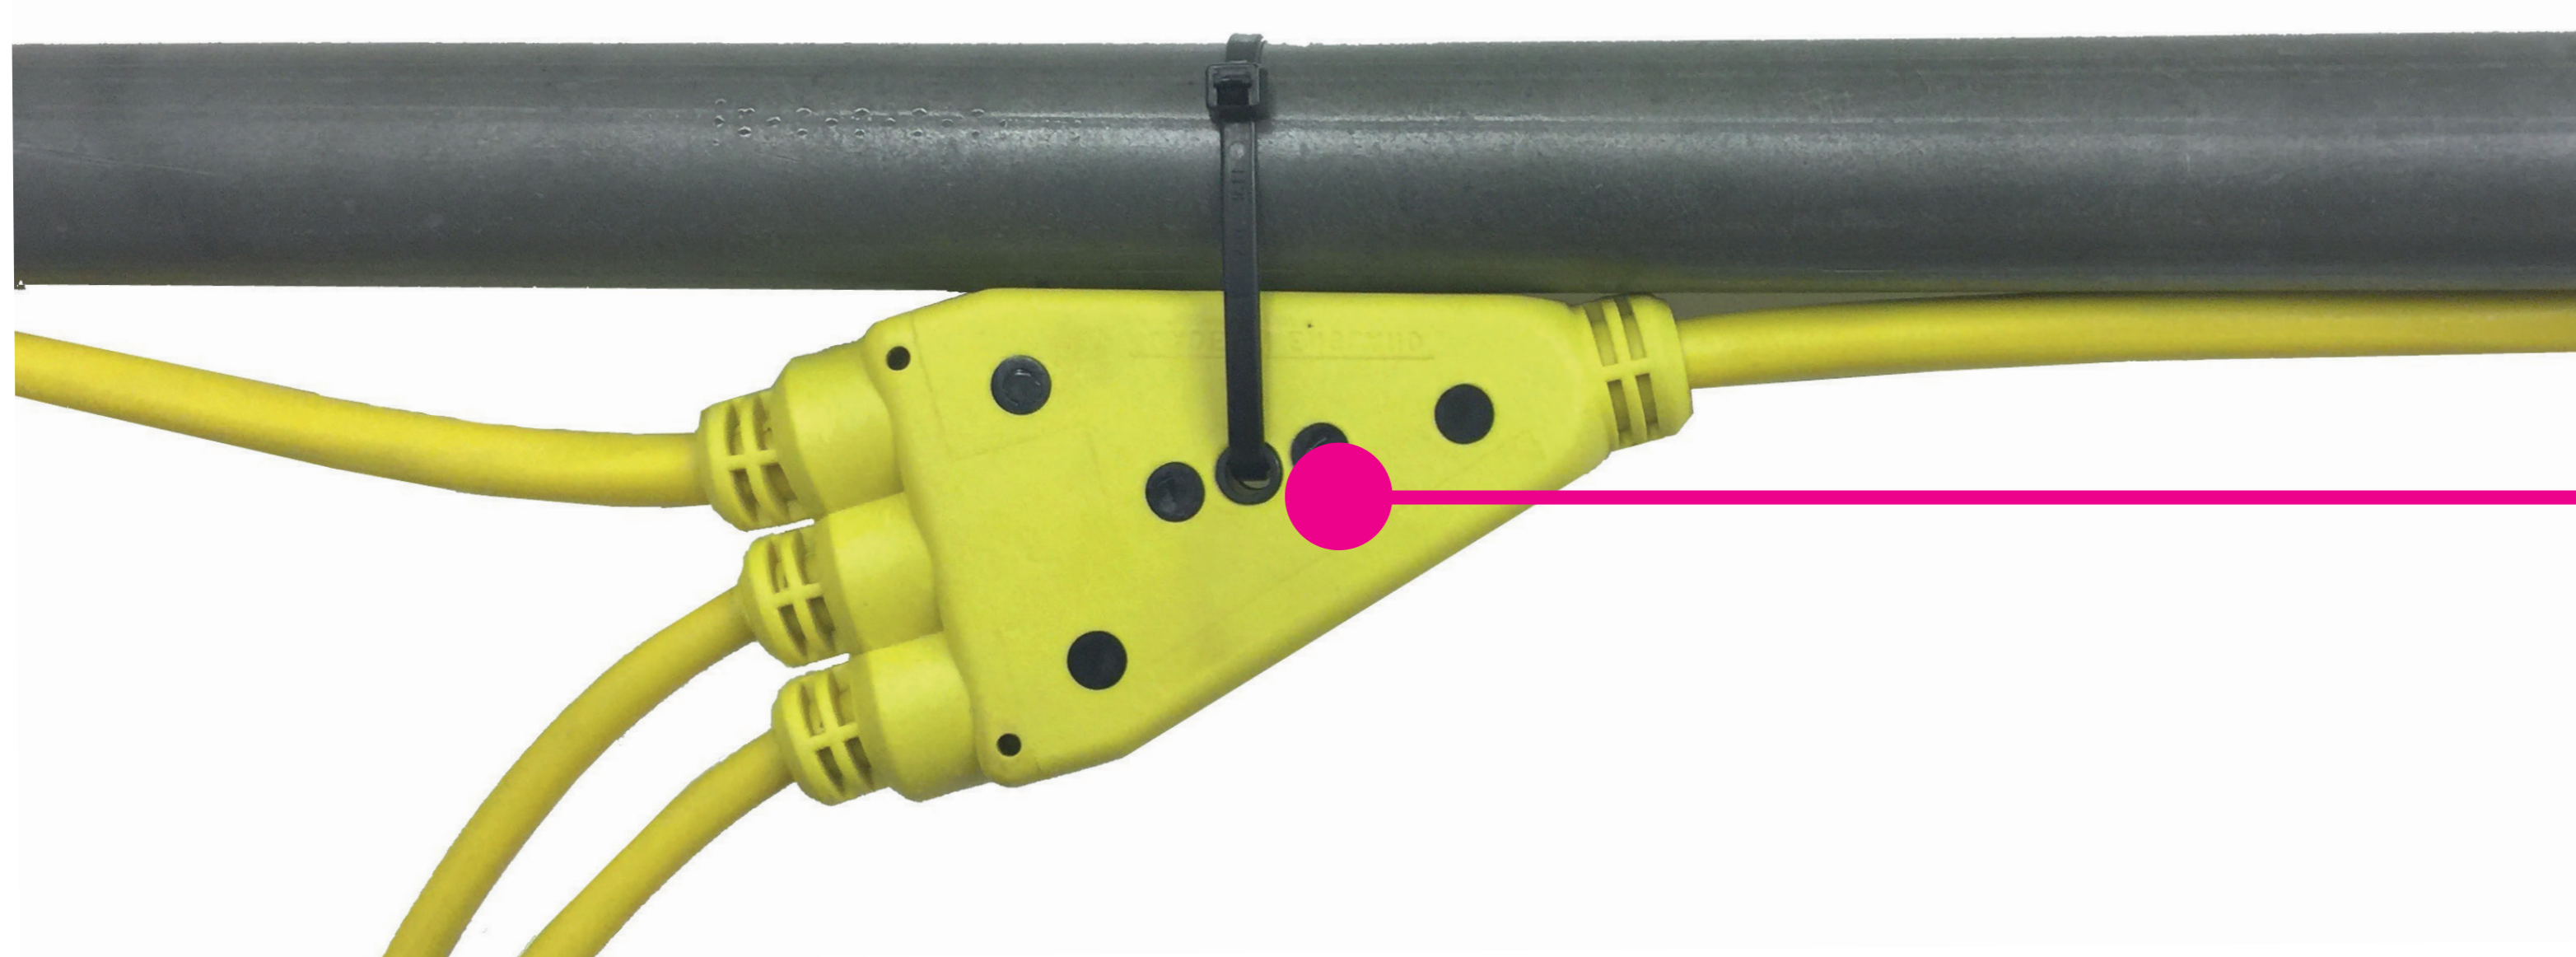

Our Y-splitter ends have the cables secured with cable ties

A strong nylon cage is secured over the wiring

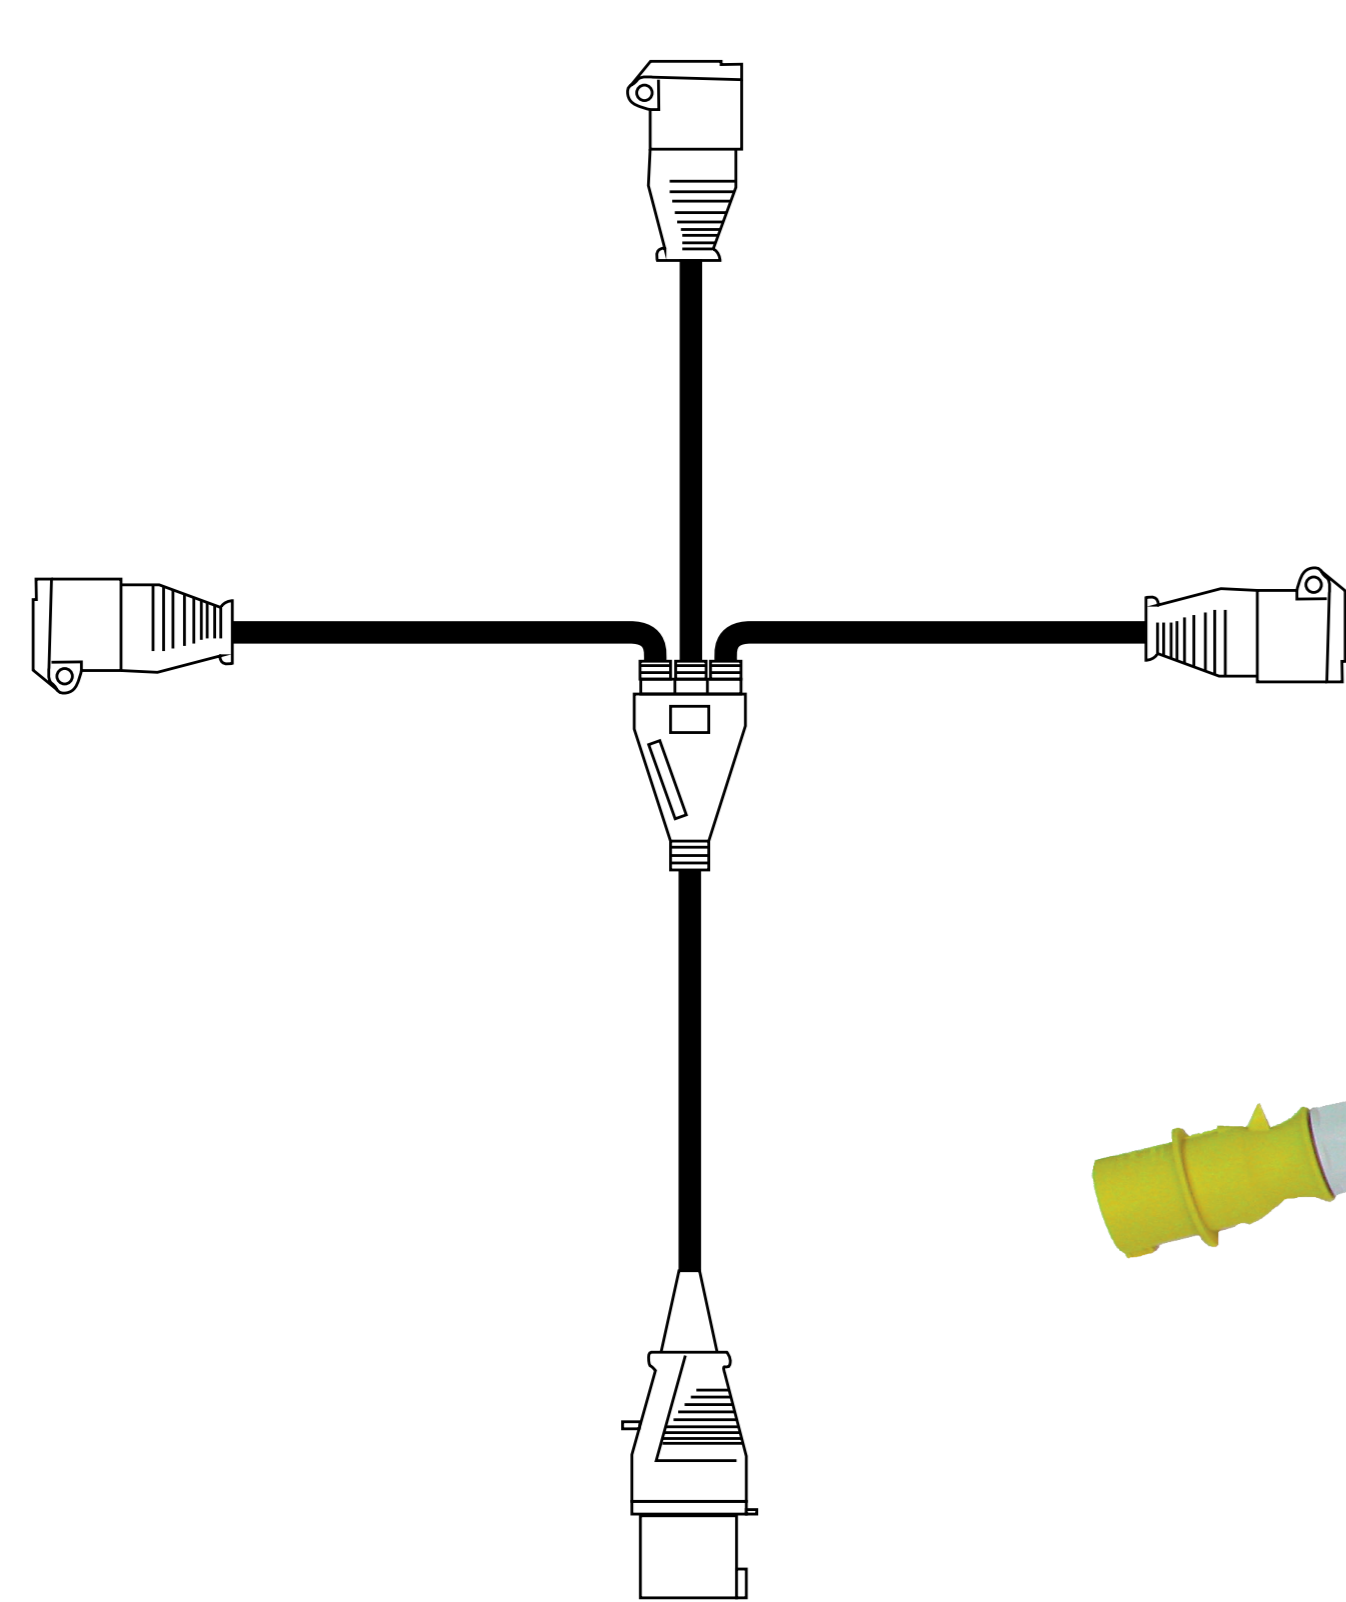

The whole splitter is then encapsulated into a sealed over-mould which is forklift-proof - IP65 rated.

Our splitters also feature a fixing hole option (for cable ties) that is secured with a nylon tube - there is no chance of exposed wires

A multiplicity of assemblies and connectors – to meet your requirements.

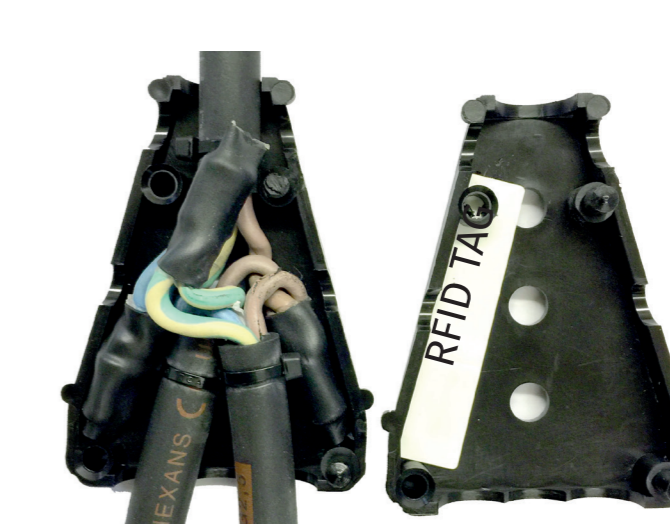

Custom Assemblies
INFINITELY VARIABLE, COMBINED POWER & LIGHT

We can design festoons to your bespoke requirements.

Optional Cable Asset Tracking
ENCAPSULATED INTO OUR SPLITTER MOULDINGS

Identify your cables using RFID tags moulded into our heavy duty splitter connectors ensuring that the RFID tag cannot be removed and you can keep track of cables using RFID Asset Tracking Systems.

The RFID TAG is fitted inside the strong nylon splitter cage

The whole splitter with RFID tag is then encapsulated into our sealed over-mould.

**Clarke
Cable**

Your concept, our creativity.
